ATTACHMENT C

UNITED STATES DEPARTMENT OF COMMERCE
The Under Secretary for International Trade
Washington, D.C. 20230

OCT 19 1981

NFAC-6754-81

MEMORANDUM FOR: William Casey
Director, Central Intelligence

FROM : Lionel H. Olmer *LHO*

SUBJECT : Technology Transfer (S)

- (S) I read with great interest the report produced by [redacted] and his staff relating to the proposed sale of grain combine technology by International Harvester to the USSR. The report presented an excellent analysis of the proposed sale. 25X1
- (S) Apart from the analytical work, there was another feature worth noting, and encouraging. It was one of the few times where the analysis presented a unified intelligence (CIA, DIA, NSA) position. Some people tend, on occasion, to use one intelligence agency against another to prove a point. Your unified approach precludes that. I strongly support this approach and urge you to continue this practice when supplying information to any Agency relating to export cases.
